**Autism, A Spectrum of Expression and Hope:
Osteopathy's Response to Neuroimmune Dysfunctions
June 21-24, 2012
Conference Director: Ali M. Carine DO C-NMM/OMM**

Everywhere you turn these days, one hears about Autism. What does it mean for you as a practitioner? America is facing an epidemic of neuroimmune dysfunction that manifests itself as a true spectrum of diagnoses. Autism is the pinnacle of this spectrum however, if you are an Osteopathic physician, you see patients with neuroimmune dysfunction everyday. The most effective osteopathic treatment requires an understanding of the neurophysiology, nutrition, medication and appropriate hands on osteopathic manipulative treatment.

At the Osteopathic Cranial Academy, we are excited to present a cutting edge annual conference. We believe that Osteopathic principles offer hope for patients with neuroimmune dysfunction. This conference will feature leading Autism neurologists and clinicians from across America paired up with talented cranial osteopathic physicians, to offer a truly osteopathic approach to Autism and neuroimmune dysfunction. Participants will be able to understand these complex physiologic processes better, the EEG findings present, learn the nutritional needs of these patients and get training on how to best use their hands to bring healing to their patients.

Thursday, June 21

2:00 p.m.	Registration
3:45 p.m.	Welcome <i>Ali Carine DO C-NMM/OMM</i>
4:00 p.m.	Autism, The Pinnacle of Neuro/Immune Dysfunction (Lecture) <i>Martha R. Herbert MD</i>
